Notes:
(1) Check with your new service representative if you have a special voltage requirements.
(2) Do not bond the neutral to the meter case. Ground the meter case with an equipment grounding conductor or by metallic conduit.
(3) A REC meter cannot be installed in a Multiple Meter Center.
(4) If supply side connection, Customer Generation Disconnect must be service entrance rated.
(5) Metering and instrument cabinets shall not be used to house Customer-owned equipment, such as distribution panels or other equipment, nor used as a junction box/through for the distribution of circuits.
(6) Fused disconnect must be used for systems 50kW and larger.
