

Move Into the Future With a PNM All-Electric Home

Homeowners can expect advanced smart technology to help lower their monthly energy bill, enhance healthier living and improve safety by eliminating concerns over carbon monoxide and gas leaks, while improving sustainability and accelerating New Mexico's climate goals.

Battery Storage

The Battery Storage Technology Tax Credit can cover up to 30% of the product cost for installing a home battery storage system.

Solar

The Federal Solar Energy Systems Tax Credit can cover up to 30% of the product cost for installing a home solar system.

Smart Thermostat

Control your home temperature settings from anywhere to help stay comfortable and save up to \$100 a year.

High-Efficiency Washer and Electric Dryer

ENERGY STAR® certified clothes washers use about 20% less energy and about 30% less water than regular washers.

Air Source Heat Pump

Delivers up to 3 times more heat energy to a home than the electrical energy it consumes.*

Heat Pump Water Heater

ENERGY STAR certified models can save a household of four about \$550 each year on energy costs compared to a standard electric water heater.†

Induction Cooking

ENERGY STAR certified electric cooking products are, on average, 18% more efficient than standard models.

Electric Vehicle Charger

ENERGY STAR certified EV chargers use 40% less energy than a standard EV charger in standby modes.‡
