\*All registered cooling program contractors are licensed and insured

Choosing a qualified contractor is a key step in ensuring your new refrigerated air conditioning or heat pump system matches your homes heating or cooling requirements and that it is properly installed to achieve maximum efficiency and comfort. PNM recommends obtaining at least three competitive bids from experienced contractors licensed to do HVAC installation work in NM. Having a new air conditioning or heat pump system installed is a significant investment in your home. Hiring a contractor unfamiliar with industry best practices for selecting, sizing and installing equipment can lead to issues with performance and safety. Contractors must provide homeowners with a certificate from the AHRI database that the system being installed is qualified for rebate. PNM does not endorse, recommend or warranty any specific contractors or their work.
