Powering New Mexico, Together

\$200 OFF SELECT ENERGY STAR CERTIFIED INDUCTION COOKTOPS AND RANGES

SAVINGS ARE SERVED.

A new ENERGY STAR certified induction cooktop or range:

- Uses electromagnetic energy to heat cookware directly, resulting in a more efficient heating process compared to conventional models. Around 85% of heating energy is transferred to the cookware.
- Allows for quicker heat-up times and better precision temperature control. For instance, boiling water with induction can take nearly half the time compared to other cooking methods.
- Heats the cookware itself, so the cooktop surface stays cool to the touch unless a pot or pan is placed on it.
- Uses the heating energy for cooking, so less heat is released into the kitchen, resulting in a cooler kitchen compared to gas or traditional electric cooktops.
