

October 1, 2026

Ms. Melanie Sandoval
Records Bureau Chief

Subject: Public Service Company of New Mexico's 2026 Distribution System Plan

Dear Ms. Sandoval:

Public Service Company of New Mexico ("PNM") hereby files with the New Mexico Public Regulation Commission ("Commission") its 2026 Distribution System Plan (2026 DSP). This plan is submitted pursuant to the Order Terminating Rulemaking and Requiring Distribution System Plans ("Order Terminating Rulemaking") issued January 30, 2026, in Docket No. 22-000089-UT, which requires PNM to file, in a new docket, a distribution system plan by October 1, 2026.

Consistent with the Order Terminating Rulemaking, PNM conducted a stakeholder process to inform the development of the 2026 DSP and is filing the plan for Commission acceptance as clarified by paragraph 14 of the Order Partially Granting Request for Clarification, issued March 13, 2026.

The 2026 DSP is being distributed to the official service list in Docket No. 22-00089-UT, as well as to those persons who participated in PNM's stakeholder process and provided their email to PNM. PNM is also posting an electronic copy on its website at www.pnm.com/distributionsystemplan.

This filing is being made electronically. If you have any questions, please contact me at latoya.ferguson@txnmenergy.com.

Respectfully submitted,

/s/ Latoya Ferguson
