## Earth Day highlights how PNM customers are powering a cleaner New Mexico

(Albuquerque, NM) – This Earth Day, PNM is highlighting significant progress toward a cleaner, more sustainable energy future for New Mexico. In 2025, PNM delivered 80% carbon-free energy to customers, marking major momentum on the path to achieving 100% carbon-free energy in the years ahead.

Electric vehicle adoption continues to grow across the state, and more than 4,000 PNM customers are now enrolled in the Whole-Home EV Charging Rate. By charging during off-peak hours, these customers are collectively avoiding 18,400 metric tons of CO<sub>2</sub> emissions every year, while also saving money on home charging.

PNM customers also played a powerful role in reducing energy use and emissions. Through PNM's Energy Efficiency programs, customers saved an estimated 84 gigawatt-hours (GWh) of electricity last year, the equivalent of powering 11,639 New Mexico homes for an entire year. These programs help customers lower their bills while reducing strain on the grid and cutting carbon emissions.

To learn more about PNM's environmental stewardship and commitment, visit [PNM.com/our-commitment](https://www.pnm.com/our-commitment).

### Energy-Saving programs available to PNM customers

PNM offers a wide range of programs to help customers save energy, lower monthly bills, and reduce environmental impact. Many programs are free or low-cost and available to both homeowners and renters.

#### PNM Refrigerator Recycling

PNM will pick up and recycle old, working refrigerators or freezers for free and customers receive a rebate for participating. Recycling older appliances can significantly reduce household energy use.

#### PNM Cooling Rebates

Customers can receive rebates on energy-efficient evaporative coolers, refrigerated air units, and smart thermostats. Efficient cooling systems help reduce summer energy costs.

#### PNM Instant Discounts
