Power restored to all customers in Las Vegas impacted by Public Safety Power Shutoff (PSPS)

(Albuquerque, NM) – PNM announced that all customers impacted by a Public Safety Power Shutoff (PSPS) in Las Vegas have been restored as of 10:10 p.m. today, April 17. PNM implemented the PSPS on Thursday, April 17, at 11:30 a.m. to prevent power lines from igniting a wildfire, protecting lives and communities.

“I want to thank our customers for your patience and kindness toward our crews,” PNM President and CEO, Don Tarry said. “I also want to thank our crews who worked through this event to keep our communities safe.”

More than 50 PNM crew members worked through the night to patrol and repair damage caused by the extreme weather. At the peak, 2,256 customers were impacted.

While the PSPS is complete, it is possible that other outages may occur as strong winds are forecasted to continue Friday. PNM asks customers experiencing a power outage to report it on [PNM.com/report-an-outage](https://www.pnm.com/report-an-outage) or by texting #OUT to 78766 from a number associated with the account, or by calling 888-DIAL-PNM.
