Prepare your home for cooler weather with a free Home Energy Checkup from PNM

(Albuquerque, NM) – As cooler temperatures set in across New Mexico, PNM is encouraging customers to take advantage of a free Home Energy Checkup to learn how their homes use energy, identify ways to improve comfort, and find opportunities to lower energy costs.

Whether some rooms feel warmer or cooler than others, energy bills seem higher than expected, or customers simply want to make their homes more efficient, the Home Energy Checkup provides personalized recommendations tailored to each household.

During the appointment, a PNM Energy Ambassador will evaluate how the home uses energy and provide practical steps that can improve efficiency while maintaining comfort. Customers can choose either an in-home or virtual appointment.

Following the assessment, customers receive a customized energy report with recommendations specific to their home. Participants also receive free energy-saving products valued at more than $100.

Depending on the home and energy needs, products may include:

- LED light bulbs
- Advanced power strips
- Efficient-flow showerheads
- Weather stripping
- Faucet aerators

The Home Energy Checkup can also help customers identify rebates and incentives that may be available for qualifying energy-efficient upgrades, including heating and cooling improvements and other home efficiency enhancements.

Helping customers make informed energy choices is part of PNM's commitment to supporting homes and communities across New Mexico. By providing personalized guidance and energy-saving resources, PNM is helping customers take greater control of their energy use while building a more energy-efficient future.

Customers can learn more or schedule a free Home Energy Checkup at PNM.com/checkup**.**
