Track your energy use, save on your PNM bill

(Albuquerque, NM) – PNM is highlighting tools available to customers that make it easier to understand how they use electricity, giving New Mexicans more control over their monthly bill. Through My Energy Usage, customers can view enhanced energy information and tailored opportunities to save.

The online tool is designed to help customers lower their bill by estimating where they use the most electricity. By monitoring monthly usage, and what's contributing to it, customers can make simple adjustments like turning off devices that aren't in use to avoid unnecessary energy consumption, that may help lower their bills.

"Knowledge is power, and understanding your energy habits is one of the easiest ways to manage your monthly bill," said Mario Cervantes, Director of Customer Experience for PNM. "These tools give customers the information they need to make choices that fit their household and help keep energy costs affordable."

Key Features of My Energy Usage

- Bill summary and monthly energy usage
- Estimated energy use by appliance (for the previous month)
- Insights and trends based on usage
- Personalized program offers and energy tips that help customers identify ways to save

Eligible customers will receive Monthly Usage reports in their inbox or by logging into their PNM account. The dashboard and reports are available to most customers at no additional cost, and access will be expanded to PNM Customer Solar participants and Whole Home EV rate customers in the near future.

As part of the upcoming SmartMeter rollout, PNM will further empower New Mexicans by offering proactive usage notifications to help avoid surprises along with insights into usage patterns throughout each day.
